

Pike's Peak June 2009 14,110 feet elevation

No, it's not sweat, my shirt is wet from the kids hitting me with snowballs.

Rode up the railroad first ...was 68 degrees at bottom and 34 at the top. Second day, we drove up the 19 mile Pike's Peak Highway....NO guardrails. On the way down, park police check brakes for overheating.

**Pike's Peak Cog Railway-operating over 100 yrs
runs summer and winter**
